JARED UCHEREK

jared.ucherek@utexas.edu | jareducherek.github.io
2501 Speedway Austin, TX 78712 | 972-322-8975

EDUCATION

The University of Texas at Austin — Master of Science, Electrical and Computer Engineering — May 2021
Current GPA: 3.78 / 4.00
Endowed ECE Fellowship – $3500/year

The University of Texas at Austin — Bachelor of Science, Electrical and Computer Engineering — May 2019
Overall GPA: 3.94 / 4.00
Honors Engineering Scholarship – $2500/year

Jesuit College Preparatory School of Dallas — May 2015

WORK EXPERIENCE

Salesforce Data Science Intern — Summer 2020
- Implemented apparel object detector for future use in Ecommerce recommender system
- Developed a PyTorch CNN for active learning to specialize on 1 million customer catalog images

NVIDIA Data Science Intern — Summer 2019
- Developed baseline visualizations for benchmarking the speed of the RAPIDS suite
- Researched graph visualization techniques for millions of network timestamps

NVIDIA Software Engineer Intern — Summer 2018
- Implemented C++ system level Watchdog for nonstop monitoring of 50 IoT devices
- Designed Docker images to streamline software development setup for NVIDIA DeepStream SDK

RESEARCH EXPERIENCE

DICE Graduate Research Assistant — Fall 2019 – Present
- Applied machine learning research under Dr. Sriram Vishwanath
- Researched neural network interpretability, and machine learning applications in medicine

RAPID Undergraduate Research Assistant — Spring 2018 – Spring 2019
- Data analysis work under Dr. Pradeep Ashok for real-time operation centers
- Published an NLP Paper to reduce workload through automated querying of daily driller memos

PUBLICATIONS

The Importance of Baseline Models in Sepsis Prediction – MLHC 2020 — Fall 2020
- Explored the MIMIC III open-source database for potential machine learning applications
- Developed baseline models competitive with black box neural networks used in similar publications

Auto-Suggestive Real-Time Classification of Driller Memos – IADC/SPE 2020 — Spring 2020
- Developed NLP models to classify drilling memos from 150 wells into 100 specified activities
- Proposed an active learning approach to help automate the workflow of drilling data entry

MISCELLANEOUS

Computer Languages: Advanced: Python, Java
Intermediate: C, C++, Linux

Current Courses: Autonomous Robots, Combinatorial Optimization, Digital Image Processing

Previous Relevant Courses: Convex Optimization, Data Science Laboratory, Probability and Stochastic Processes
