JARED UCHEREK

jared.ucherek@gmail.com | 972-322-8975
jareducherek.github.io

WORK EXPERIENCE

Advent International, *Data Scientist* 2022 – Present

- Performed deal diligence using over 20 alt datasets from web scraping or aggregated sources
- Automated the creation of analysis spreadsheet that summarized historical business KPIs

Boston Consulting Group, *Data Scientist* 2021 – 2022

- Developed Airflow pipeline with PySpark to combine and process over 3 million customer transactions
- Created a dataset useful for training a consumer recommender system from processed transactions

INTERNSHIP EXPERIENCE

Salesforce, *Data Science Intern* Summer 2020

- Implemented apparel object detector for future use in Ecommerce recommender system
- Developed a PyTorch CNN for active learning to specialize on 1 million customer catalog images

NVIDIA, *Data Science Intern* Summer 2019

- Developed baseline visualizations for benchmarking the speed of the RAPIDS suite
- Researched graph visualization techniques for millions of network timestamps

NVIDIA, *Software Engineer Intern* Summer 2018

- Implemented C++ system level Watchdog for nonstop monitoring of 50 IoT devices
- Designed Docker images to streamline software development setup for NVIDIA DeepStream SDK

EDUCATION

The University of Texas at Austin, Master of Science, *Computer Engineering* May 2021

- Overall GPA: 3.8 / 4.0

The University of Texas at Austin, Bachelor of Science, *Computer Engineering* May 2019

- Overall GPA: 3.9 / 4.0

RESEARCH EXPERIENCE

DICE Graduate Research Assistant Fall 2019 – Fall 2021

- Applied machine learning research under Dr. Sriram Vishwanath
- Researched neural network interpretability, and machine learning applications in medicine

RAPID Undergraduate Research Assistant Spring 2018 – Spring 2019

- Data analysis work under Dr. Pradeep Ashok for real-time operation centers
- Published an NLP Paper to reduce workload through automated querying of daily driller memos

PUBLICATIONS

***The Importance of Baseline Models in Sepsis Prediction*, MLHC 2020** Fall 2020

- Explored the MIMIC III open-source database for potential machine learning applications
- Developed baseline models competitive with black box neural networks used in similar publications

***Auto-Suggestive Real-Time Classification of Driller Memos*, IADC/SPE 2020** Spring 2020

- Developed NLP models to classify drilling memos from 150 wells into 100 specified activities
- Proposed an active learning approach to help automate the workflow of drilling data entry

SKILLS

Programming Languages:	*Python, SQL, C++, Java, Bash*
Python Tools:	*PySpark, Pandas, PyTorch, Scrapy, Selenium, OpenCV, Detectron2*
Development Tools:	*Git, Github workflows, Jenkins, Docker, S3, GCP, Databricks, VSCode, Vim*
