WORK EXPERIENCE

Advent International, *Data Scientist* 2022 – Present

- Developed machine learning techniques for diligence and valuation of \$1B+ companies, saving ~\$1M in contract fees
- Worked with internal portfolio companies to improve B2B sales processes and predict customer churn using time series forecasting models
- Created robust automation code for refreshing datasets, scraping websites, and updating dashboards
- Deployed ~\$500k in alternative datasets with AWS and Snowflake, using SQL and Python to clean and process for insights
- Interviewed candidates through technical case studies and onboarded 5 new hires for junior data scientist roles

Boston Consulting Group, *Data Scientist* 2021 – 2022

- Developed and deployed a recommender system on a processed transaction dataset using Databricks and MLflow
- Established an Airflow pipeline with PySpark to combine and process over 10 million customer transactions
- Solved for historical redemption rates on discount campaigns spanning 5 years and 300+ store locations
- Curated a dataset for integration tests and smoke tests in an internal recommender system library
- Created tutorials for environment set up and onboarded 2 data scientists onto an internal developer team

INTERNSHIP EXPERIENCE

Salesforce, *Data Science Intern* 2020

- Deployed PyTorch CNN on AWS with active learning to enrich 1 million customer catalog images
- Utilized Detectron2 to evaluate performance for several object detection models such as RetinaNet and DETR

NVIDIA, *Data Science Intern* 2019

- Developed visualizations for benchmarking the speed of the open-source RAPIDS suite
- Researched graph visualization techniques using GPU for millions of network timestamps

NVIDIA, *Software Engineer Intern* 2018

- Implemented a C++ system level Watchdog to monitor 50 IoT devices deployed throughout the headquarters
- Designed Docker images to streamline software development setup for NVIDIA DeepStream SDK

EDUCATION

M.S. The University of Texas at Austin, *Computer Science*, Overall GPA: 3.8/4.0 2019 – 2021

B.S. The University of Texas at Austin, *Computer Science*, Overall GPA: 3.9/4.0 2015 – 2019

RESEARCH EXPERIENCE

DICE Graduate Research Assistant 2019 – 2021

- Researched neural network interpretability, and machine learning applications in medicine

RAPID Undergraduate Research Assistant 2018 – 2019

- Explored data science topics in petroleum engineering help improve efficiency in multiple parts of the supply chain

PUBLICATIONS

The Importance of Baseline Models in Sepsis Prediction, MLHC 2020 2020

- Explored the MIMIC III open-source database for potential machine learning applications
- Developed baseline models competitive with black box neural networks used in similar publications

Auto-Suggestive Real-Time Classification of Driller Memos, IADC/SPE 2020 2020

- Generated NLP models to classify drilling memos from 150 wells into 100 specified activities
- Proposed an active learning approach to automate the workflow of daily drilling data entry required by engineers

SKILLS

Programming Languages: Python, SQL, C++, Java, Bash

Python Tools: PySpark, Pandas, PyTorch, Scrapy, Selenium, OpenCV, Detectron2, Matplotlib, Statsmodels

Development Tools: Git, Github workflows, Jenkins, VSCode, Vim, S3, GCP, Databricks, Docker, AWS, Snowflake
