EDUCATION

The University of Texas at Austin	Master of Science, Electrical and Computer Engineering Overall GPA: 3.81 / 4.00 Endowed ECE Fellowship – \$3500/year	May 2021
The University of Texas at Austin	Bachelor of Science, Electrical and Computer Engineering Overall GPA: 3.94 / 4.00 Honors Engineering Scholarship – \$2500/year	May 2019

WORK EXPERIENCE

Advent International, <i>Data Scientist</i>	2022 – Present
- Performed deal diligence using over 20 alt datasets from web scraping or aggregated sources - Automated the creation of analysis spreadsheet that summarized historical business KPIs	
Boston Consulting Group, <i>Data Scientist</i>	2021 – 2022
- Developed Airflow pipeline with PySpark to combine and process over 3 million customer transactions - Created a dataset useful for training a consumer recommender system from processed transactions	

INTERNSHIP EXPERIENCE

Salesforce, <i>Data Science Intern</i>	Summer 2020
- Implemented apparel object detector for future use in Ecommerce recommender system - Developed a PyTorch CNN for active learning to specialize on 1 million customer catalog images	
NVIDIA, <i>Data Science Intern</i>	Summer 2019
- Developed baseline visualizations for benchmarking the speed of the RAPIDS suite - Researched graph visualization techniques for millions of network timestamps	
NVIDIA, <i>Software Engineer Intern</i>	Summer 2018
- Implemented C++ system level Watchdog for nonstop monitoring of 50 IoT devices - Designed Docker images to streamline software development setup for NVIDIA DeepStream SDK	

RESEARCH EXPERIENCE

DICE Graduate Research Assistant	Fall 2019 – Fall 2021
- Applied machine learning research under Dr. Sriram Vishwanath - Researched neural network interpretability, and machine learning applications in medicine	
RAPID Undergraduate Research Assistant	Spring 2018 – Spring 2019
- Data analysis work under Dr. Pradeep Ashok for real-time operation centers - Published an NLP Paper to reduce workload through automated querying of daily driller memos	

PUBLICATIONS

<i>The Importance of Baseline Models in Sepsis Prediction</i> – MLHC 2020	Fall 2020
- Explored the MIMIC III open-source database for potential machine learning applications - Developed baseline models competitive with black box neural networks used in similar publications	
<i>Auto-Suggestive Real-Time Classification of Driller Memos</i> – IADC/SPE 2020	Spring 2020
- Developed NLP models to classify drilling memos from 150 wells into 100 specified activities - Proposed an active learning approach to help automate the workflow of drilling data entry	

MISCELLANEOUS

Programming Languages:	Python, SQL, C++, Java, Bash
Python Tools:	PySpark, Pandas, PyTorch, Scrapy, Selenium, OpenCV, Detectron2
Development Tools:	Git, Github workflows, Docker, S3, GCP, Databricks, VSCode, Vim
